

EDUCATION

Bachelor of Technology in Industrial and Systems Engineering

July 2019 - May 2023

Indian Institute of Technology, Kharagpur

CGPA: 7.69/10

WORK EXPERIENCE

DATA ENGINEER | EXL SERVICE

Oct 2023 - Present

Project: End-to-End Data Product Development

TechStack: Databricks, AWS, SQL, Python, Pyspark, Github, Excel

- Designed and deployed 12+ end-to-end production-grade **data products** across domains (vehicle telemetry, customer, app usage) using **Databricks** with **AWS**-based data sources, improving data accessibility for 5+ business units.
- Owned the **end-to-end data pipeline lifecycle**, including requirements gathering, profiling, design documentation, transformation, development, testing, deployment, orchestration, and monitoring.
- Built **ETL workflows in Databricks**, implementing incremental loads, SCD logic, & current-record snapshot views.
- Collaborated with data architects to design robust **data models**, documenting all logic in Excel for reuse.
- Optimized compute performance by migrating **SQL-based to PySpark**, reducing pipeline runtime by 40%.
- Automated orchestration and deployments with **GitHub and Databricks jobs**, enabling smooth daily workflows.
- Delivered **100%+ SLA compliance** by proactively handling bugs, enhancements, and Change Requests.
- Engaged daily with **business stakeholders** in Agile ceremonies, ensuring timely delivery and business alignment.

Project: On-Prem to Cloud Migration

TechStack: Databricks, SparkSQL, Pyspark, GitOps, Hive, Excel, Yaml

- Modernized on-prem **Hive pipelines** by replatforming **20+ applications** onto **Databricks** for scalable analytics.
- Refactored legacy HQL transformations into **SparkSQL**, replicating **ETL workflows** and aligning them with cloud-native standards.
- **Automated ETL deployment pipelines** using YAML & GitOps to enable version-controlled and reliable releases.
- Improved scalability and reduced operational overhead by consolidating jobs into a unified cloud architecture.

Project: Data Engineer SRE

TechStack: Python, SQL, Databricks, Jira, Confluence, Datadog, GitHub, Temporal.io

- Supported PRR onboarding by reviewing data architectures, pipeline dependencies, and readiness for Databricks.
- Assessed monitoring, alerting, and observability for data pipelines using Datadog and internal observability platforms.
- Tracked PRR action items and documented readiness gaps while collaborating with application and platform teams.
- Reviewed incident and change management records to identify **data pipeline** and platform risks during PRR evaluations

SKILLS AND EXPERTISE

Programming & Data : SQL, Python, PySpark, Pandas, NumPy, Data Processing, Data Analytics, EDA

Big Data : Databricks, Medallion Architecture, Apache Spark, Hive, Hadoop, Delta Lake, Data Lakehouse, AWS

Data Engineering : ETL / ELT Pipelines, Batch Processing, Incremental Loads, Change Data Capture (CDC), SCD (Type 1 & 2), Data and Dimensional Modeling, Schema Evolution, Partitioning, Performance Optimization, Quality Checks

Workflow Orchestration & DevOps : Apache Airflow, GitHub, GitOps, CI/CD Pipelines

Platform & SRE : Production Support, Monitoring, Incident Management, Root-Cause Analysis, SLA Compliance

Soft Skills : Problem-Solving, Analytical Thinking, Agile Collaboration, Stakeholder Management, Communication

ACHIEVEMENTS

- Secured an **AIR 154** in **JEE B.Arch** among 3.2 lakhs candidates organised by NTA in 2019
- Secured an **AIR 6732** in **IIT JEE MAINS** among 11.7 lakhs candidates organised by NTA in 2019
- Secured an **AIR 9676** in **IIT JEE Advanced** among 1.7 lakhs candidates organised by IIT Roorkee in 2019
